

SNAKEGUARD LITE - EMERGENCY ACTION PLAN

Generated: 18 May 2026 13:56 | For immediate emergency use only

Identified Species

Red Sand Boa (*Eryx johnii*)

Danger Level

NONE

AI Assessment

The Red Sand Boa is a non-venomous, docile fossorial snake. It is easily identified by its thick body and extremely blunt tail that resembles its head, a defense mechanism to confuse predators.

First Aid Instructions

1. Stay calm - panic increases venom absorption.
2. Immobilize the bitten limb - keep it below heart level.
3. Remove rings, watches, tight clothing near the bite.
4. Do NOT cut the wound or try to suck out venom.
5. Do NOT apply tourniquet or ice.
6. Note the time of the bite immediately.
7. Rush to the nearest hospital for antivenom treatment.
8. Call emergency services: 115 (Rescue Pakistan)
