

SNAKEGUARD LITE - EMERGENCY ACTION PLAN

Generated: 18 May 2026 14:20 | For immediate emergency use only

Identified Species

Banded Krait (*Bungarus fasciatus*)

Danger Level

CRITICAL

AI Assessment

The Banded Krait is a highly venomous elapid with potent neurotoxic venom. While generally shy, its bite is a life-threatening medical emergency that requires immediate professional intervention and antivenom.

First Aid Instructions

1. Reassure the victim and keep them as still as possible to slow the spread of venom through the lymphatic system.
2. Immobilize the bitten limb using a splint or sling, keeping it at or below the level of the heart.
3. Remove any rings, watches, or tight clothing from the affected limb before swelling begins.
4. Transport the victim immediately to the nearest medical facility that can provide antivenom and respiratory support.
5. Do not cut the wound, apply a tourniquet, or attempt to suck out the venom, as these actions can cause further harm.
