

SNAKEGUARD LITE - EMERGENCY ACTION PLAN

Generated: 18 May 2026 14:24 | For immediate emergency use only

Identified Species

Red Sand Boa (*Eryx johnii*)

Danger Level

NONE

AI Assessment

The Red Sand Boa is a non-venomous constrictor. It is easily identified by its thick body and extremely blunt tail that resembles its head. It poses no threat to humans.

First Aid Instructions

1. Remain calm and move a safe distance away from the snake to prevent any further bites.
2. Wash the bite wound thoroughly with mild soap and clean running water to remove bacteria and reduce the risk of infection.
3. Apply a sterile dressing or clean bandage to the area to protect the puncture site from environmental contaminants.
4. Consult a healthcare professional to verify your tetanus vaccination status and determine if a booster shot is necessary.
5. Monitor the wound site for several days for signs of secondary infection, such as increasing redness, warmth, swelling, or discharge.
